

Aakriti: I work in a multi-national company. My income is Rs 10 lakh per year. I live in a 2BHK apartment which is 10 years old. Please tell me in what ways can I change the lighting in my apartment. I mainly use halogen bulbs and tube lights. They heat up my room a lot and my electricity bill also increases.

Abhay Kumar: Please replace them with LED lights.

Thanga: Hi, I am planning to buy a house at Bangalore, Not sure, buy a house which ready to move in 3 - 6 months or invest in new Projects which launched recently?

Abhay Kumar: You need to check with Bangalore Dev authority get the comprehensive list of that.

Sarika: Has the government planned any special concessions for people investing in a green Home?

Abhay Kumar: SBI has taken some initiatives of less interest rest for buyers there is no specific benefit by govt.

Abhay Kumar: It was a great answering you all. There can be a long session which we need to explain the concept of green building. In India the green building revolution has started and buyers need to demand for it to pressurize the builder community and govt to make it mandatory as it is combined benefit for all involved buyers, developer, govt authorities, banks and would ultimately address to some concerns of our mother EARTH.
